

SOOKUN DEEVESH

Allee Brillant Castel Vacoas-Phoenix | 57078818 | deevhsookun@gmail.com

SUMMARY

I am Sookun Deevesh, a final-year BSc (Hons) Computer Science with Network Security student at the University of Technology, Mauritius, with expected graduation in September 2026. My focus is on cybersecurity, secure software development, and network protection. I enjoy building practical, reliable systems with strong security foundations, and I am currently developing my career toward cybersecurity and software engineering roles.

Alongside my studies, I have built hands-on experience through technical projects and real work environments. My capstone project, Cryptotrade, is a production-oriented cryptocurrency trading simulation platform built with React, Node.js, Express, MongoDB, and real-time technologies. I also developed secure application projects in Java, Python, and SQL-based systems.

SKILLS

- Network security fundamentals
- Vulnerability assessment
- Secure coding
- Port scanning
- Network analysis
- API testing with Postman
- Java and Python
- JavaScript and SQL
- HTML5 and CSS3
- Bootstrap framework
- Version control with Git
- Development environments
- Database management
- Linux and Ubuntu systems
- Containerization with Docker
- UI/UX design

EXPERIENCE

Network and Security Trainee (Internship)

Rogers Capital Technology - Port Louis

- Acquired practical knowledge of network operations and security practices by supporting technical tasks and observing enterprise infrastructure and security workflows.
- Assisted in daily operations of technology support team.
- Provided technical assistance to clients and team members.
- Collaborated with colleagues on project documentation and reporting.

Pharmacist Assistant

Biladams Pharmacy - Vacoas-Phoenix

- Supported daily pharmacy operations, enhancing customer service, organizing products, and managing stock.
- Assisted pharmacists in preparing and dispensing medications to customers.
- Maintained inventory levels and organized pharmaceutical supplies efficiently.
- Supported customer inquiries by providing accurate medication information.

Sales Agent

Vivid Solution - Quatre Bornes

- Managed client interactions and sales presentations in target-driven environment; enhanced persuasion and follow-up skills, improving customer-facing professionalism.

- Developed strong customer relationships through effective communication and active listening.
- Assisted clients in selecting products that meet their needs and preferences.
- Processed sales transactions accurately using point-of-sale systems.

EDUCATION

Expected in 09/2026

BSc (Hons): Computer Science with Network Security

University of Technology Mauritius

- Expected graduation: September 2026
- Programme code: BCNS
- Duration: 3 years (6 semesters)
- Official programme page included: <https://www.utm.ac.mu/courses/bsc-hons-computer-science-with-network-security-mauritius/>

ACADEMIC LEARNING OUTCOMES

- Strong programming and software design discipline
- Practical secure-system implementation understanding
- Ability to analyze network risks and propose mitigations
- Hands-on database-backed application development
- Problem-solving aligned to IT and cybersecurity roles

TOOLS AND SOFTWARE STACK

- Git
- VS Code
- IntelliJ IDEA
- MySQL
- Linux / Ubuntu
- Docker
- Postman
- Wireshark
- Nmap
- Figma
- putty

RELEVANT AREAS OF STUDY

- Programming and Software Development
- Data Structures and Algorithms
- Database Systems
- Computer Networks
- Operating Systems
- Software Engineering
- Web Development
- Network Security Fundamentals

FEATURED CAPSTONE PROJECT

Cryptotrade – Cryptocurrency Trading Platform, Final Year Capstone 2026 (Blockchain and FinTech), Student project under your degree programme, Sandya Armoogum, <https://crypto-trade-fyp.vercel.app>, Production-oriented simulation platform for

realistic crypto trading learning without real financial risk., React 18+, Vite, React Router v6, Node.js, Express.js (REST APIs), MongoDB Atlas, Socket.IO, CoinGecko API, Gmail SMTP, Twilio SMS, Public + protected page architecture, Multiple trading modes, Virtual wallet operations, KYC workflow and OTP verification, Transaction/history tracking, AI assistant integration, JWT auth, role-based access, bcrypt password hashing, OTP via email/SMS, Rate limiting and activity logging, Automated testing expansion, Stronger cloud KYC document governance, Deployment hardening (SSL/WAF/monitoring), Blockchain settlement integration phase

LEADERSHIP EXPERIENCE

President, Student Union, University of Technology, Mauritius, Led student-focused initiatives and coordinated activities, Organized and supervised events for stronger student participation, Collaborated with university departments to address concerns, Built leadership, planning, and communication capabilities
